## HELPING PEOPLE REACH THEIR FULL POTENTIAL IN CHRIST

The world today is very diverse with so much going on, some good and some not so good. In the midst of all this churches are often struggling to stay relevant and enable their people to be all that God has called them to be and for their church to fulfil its vision.

Now there is a source of encouragement, a ministry, Living Word UK, which has a heart and passion to come alongside and help people, leaders and churches to work strategically to reach their full potential in Christ by the power of God.

With many years experience Living Word is launching a new opportunity which will enable you to benefit through the application of some of our specific spiritual growth modules.

Here is some of what we have to offer

1) An initial complimentary session either by phone, skype or personal visit with you and your key leadership team to determine your needs. This provides a secure comfortable opportunity for you to open up and share where you are as a church and people. This will enable us to present some specific areas where we can help and discuss what we can facilitate.

2) The provision by Living Word of training, teaching, coaching and mentoring in the areas you identify are your greatest need

These are usually broken down into 3 key development functions where Living Word can bring the greatest input and support.

These 3 areas are highlighted at the side and illustrate the kind of input we can bring to assist you. The range of services is not exhaustive but is intended to provide a flavour and overview of where we are specifically able to assist.

The unique value to you is that you are able to direct the support to the areas that you have identified as your key needs, therefore targeting it where you most need it rather than sign up for a blanket course some of which you may not require.

TONY SHEARD
